EDUCATION

Georgia State University - M.S. Computer Science	Aug 2025 - Present
Atlanta, GA	
Hindustan Institute of Technology & Science - B.Tech Computer Science (AI & ML)	Jun 2025
Chennai, India CGPA: 7.92/10	

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS | **AI/ML:** PyTorch, TensorFlow, scikit-learn, OpenCV, CNNs, transfer learning, prompt engineering | **Development:** React Native, Expo, Next.js, Supabase, REST APIs, Git/GitHub, WordPress | **Data/Cloud:** Pandas, NumPy, data preprocessing, visualization, AWS fundamentals

EXPERIENCE

Software Engineering Intern Fluezen Technology	May 2026 - Jul 2026
Chennai, India	
- Developed and tested web and mobile application features, translating client requirements into maintainable product functionality. - Debugged application issues and collaborated with cross-functional teammates through iterative development and review cycles.	
Web Development Intern Acaprep	Aug 2023 - Jan 2024
Remote, Dallas, TX	
- Redesigned and maintained an education company website, contributing to a 73% year-over-year increase in traffic. - Optimized WordPress performance to reduce page-load time by 30% while maintaining 91% site uptime.	
Machine Learning Intern Edu-versity	Nov 2022 - Dec 2022
Chennai, India	
- Built diabetes-prediction and fraudulent-transaction classification models using Python, preprocessing, feature analysis, and supervised learning. - Evaluated patterns and model outputs, then presented findings and recommendations to project collaborators.	

SELECTED PROJECTS

Swasthatha - AI Mental Wellness Companion Founder, Product Manager & Developer	Ongoing
- Building a privacy-focused React Native/Expo application with Supabase authentication, local/cloud storage controls, journaling, daily check-ins, and conversation history. - Engineered an OpenAI-powered assistant with context-aware prompting, emotional-intensity detection, reflection summaries, and conditional calming workflows while explicitly positioning the product as support, not therapy.	
Personal Finance Intelligence Dashboard Product & ML Developer	Work in Progress
- Designing a receipt and bill ingestion pipeline using OCR to extract merchants, dates, totals, and line items, with user verification before expense records are saved. - Architecting automatic expense categorization, spending and savings analytics, anomaly detection, and non-judgmental recommendations for reducing avoidable purchases.	
Cleft Detection in Antenatal Ultrasound ML Researcher	2025
- Developed an EfficientNetB0 transfer-learning pipeline to classify prenatal ultrasound images and added input filtering to reject irrelevant or incompatible scans. - Applied preprocessing, augmentation, evaluation, and Grad-CAM explainability; presented the peer-reviewed work at ICCCNT 2025.	

CERTIFICATIONS

AWS Academy Cloud Foundations | Python for Data Science, AI & Development (Coursera) | Accenture Data Analytics & Visualization Job Simulation
